Chief Engineer's Report.

In compliance with the law I submit the following report:

The fire apparatus consists of an Amoskeag fire Engine, the Daniel Webster, No. 1; 30 feet of suction hose, and the necessary discharge pipes, nozzles, lanterns and tools; the Kenrick hose carriage with 650 feet of 2½ inch leather hose and 600 feet rubber lined hose.

A hook and ladder truck, with a good supply of ladders, and the necessary supply of apparatus to go with the same, in good condition.

All located in the Engine House on Central street, near the Lower Paper Mill, in Franklin Falls village.

One hand hose carriage, with 450 feet of 2½ inch rubber lined hose, located at No. 1, paper mill, and 200 feet 2½ inch rubber lined hose, located at Taylor's foundry, in connection with new force pumps and new building.

Franklin Fire Engine, No. 1, with hose reel and about 800 feet of 2 inch leather hose, located on Main street, in Franklin village.

All the reservoirs are in good condition, except the one at the depot, which is in much need of repair. The water from the reservoirs and supply from the mills are sufficient for an ordinary fire, but not equal to a large conflagration.

FIRE RECORDS.

Dec. 16. Fire in Mrs. S. J. Wallace's dwelling house on Franklin St., occupied by Mrs. Sarah Clough and S. S. Hoyt. Caused by defect in chimney. Loss \$1800. Insured 1200.

RECOMMENDATIONS.

An additional supply of water is imperatively required for the public safety, and should receive immediate attention.
